DETAILED ACTION

Drawings

Figures 1-4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 7 is objected to because of the following informalities: the claim 7 is redundant because its limitation already defined in the independent claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 7, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Egashira (US Patent 6,414,638).

Egashira discloses, in figures 1 and 2, an antenna device for a mobile communications terminal comprising an antenna housing 51 extending from a main body of the mobile communications terminal, a helical antenna 20 disposed in the antenna housing, a whip antenna 10 having at one end an insulator 12 having a length shorter than a length of the helical antenna and at another end a rod antenna 14, a conductive tube 60 disposed in the main body of the mobile communications terminal for receiving the rod antenna in the retracted and extended position of the whip antenna.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Egashira in view of Baldry (US Patent 5,353,036).

The patent to Egashira, described above, differs from the claimed invention because it does not an insulating tube formed in the inner surface of a conductive tube. Baldry discloses, in figures 1 and 2, a retractable antenna for a communications terminal having a conductive tube 10 for receiving a rod antenna, and an insulating tube 10 formed in the conductive tube 10. Therefore, it would have been obvious to employ

Art Unit: 2821

the conductive tube of Egashira with an insulating tube for the purpose of providing the rigidity of the conductive tube.

The patents to Makino, Ha et al, Ha, Tsuda, Eggleston, Woo et al, Oh et al, Ishikawa, Kim et al are cited as of interest showing the retractable antenna similar to that disclosed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Ho whose telephone number is (703)308-4080. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (703)308-4856.
